

Global Corporate Bond Fund Introduction

Fund Overview

The Milford Global Corporate Bond Fund is an actively managed NZ dollar hedged fixed interest fund. It primarily invests in a diversified portfolio of global corporate bonds. The Fund is managed by Milford's experienced fixed interest team and leverages the skills of the wider Milford investment team of over 20 investment professionals in Auckland and Sydney.

Investment Objective

To generate a positive, NZ dollar hedged return that exceeds the benchmark over the minimum recommended timeframe of three years.

Investment Strategy

The Fund aims to achieve its objective through active management of a diversified portfolio of global debt instruments, primarily corporate bonds, with an average credit rating of at least "BB" and a long term neutral target of "BBB-".

The Fund invests in the liquid and diverse universe of global debt instruments. It targets exposures to debt instruments offering the best risk adjusted NZ dollar hedged yields across multiple markets. This includes active management of asset allocation between currency markets, credit sectors (e.g. High Yield versus Investment Grade), industry sectors and company capital structures. Interest rate exposures are also actively managed across different currency allocations.

The Fund's neutral position is to fully hedge all foreign currency exposures back to NZ dollars.

Who the Fund Suits

The Fund suits investors looking for:

- Global fixed interest exposure (NZ dollar-hedged)
- A truly active, and largely unconstrained approach to fixed interest investing that targets:
 - Outperformance of its benchmark
 - Absolute returns over the minimum recommended timeframe
 - Broad diversification of credit and interest rate risk
- Exposure to global corporate debt instruments, ranging from Investment Grade to High Yield and Loans
- An investment horizon of at least three years
