Short-dated NZ dollar bank bills, a reflection of interbank funding levels, continued their move higher throughout the month, driven by heightened market expectations of larger Official Cash Rate (OCR) increases in the near term. The market is currently attaching a significant probability of another 0.75 percentage point OCR increase at the next Reserve Bank of New Zealand meeting in February, when its Monetary Policy Statement (MPS) will be released.

Looking forward, this should continue to benefit the Fund by increasing the interest rates into which it can progressively reinvest maturing holdings. Our base case remains for higher interest rates from here albeit, as it stands, elevated market expectations could be higher than what may be realised if inflation moderates and/or growth slows.

The portfolio management of the Fund remains focused on maintaining its low-risk strategy which is built on a diversified portfolio of cash, short-dated debt securities and term deposits, so as to protect capital.
