In December the Fund generated a return of 0.2%, in line with its objective to deliver a return in excess of the Reserve Bank of New Zealand (RBNZ) Official Cash Rate (OCR) after fees.

Short-dated NZ dollar interest rates moved higher during the month as financial markets began pricing in the possibility of future increases to the OCR instead of further cuts. The RBNZ indicated that the OCR is likely to remain at 2.25% for some time, provided economic conditions evolve broadly in line with its current outlook. Financial markets are currently pricing a 0.25% increase in the OCR by the end of 2026.

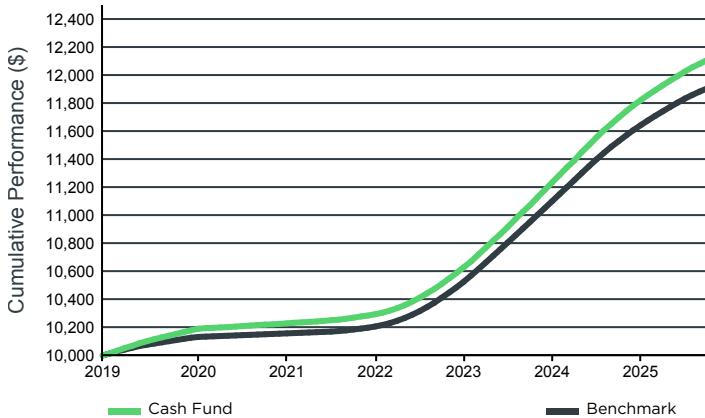

The portfolio management of the Fund remains focused on maintaining its low-risk strategy, which is built on a diversified portfolio of cash, short-dated debt securities and term deposits, so as to protect capital. As a reminder, while the yield of the Cash Fund may vary over time, we remain confident in meeting our goal of delivering returns above the OCR after fees.
