## Conservative Fund

Portfolio Investment Entity

# Monthly Fact Sheet as at 31 December 2021

### Portfolio Managers

Mark Riggall Co-Portfolio Manager

The Fund enjoyed a strong end to the year, gaining 1.4% in December, recovering much of the recent weakness. As December progressed, confidence improved that economies could navigate the Omicron Covid wave and the removal of extremely loose central bank monetary policy settings. This underpinned the annual "Santa Rally" in risky assets which helped the Fund's shares (to which exposure had been increased) post strong gains and led corporate bonds (the Fund's predominant bond exposure) to outperform a mixed month for government bonds. Most of the Fund's corporate bonds posted positive returns and they continue to recover from recent underperformance relative to government bonds.

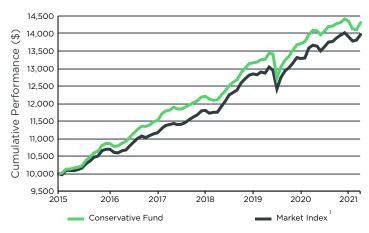

High yield bonds and subordinated bonds of investment grade rated companies delivered a higher return than investment grade bonds, being more insulated from rising market interest rates. There were broad based gains across the Fund's shares. Income oriented, growth and cyclical shareholdings all broadly speaking posted gains, but it was another call out month for property shares and global infrastructure shares (especially roads and airports).

Looking forward, our base case remains for positive but moderate Fund returns in 2022. Market interest rates are likely to rise as central banks tighten policy to combat high inflation but should remain historically low. Nevertheless, this may be a headwind for bonds, so we continue to limit interest rate exposure. The Fund's share exposure may be close to its long run neutral, as the earnings outlook remains positive and interest rates remain historically low, but given likely rising interest rates and increased market volatility it will remain actively managed in terms of allocating across different countries and sectors.

<sup>1.</sup> The Fund does not have a performance benchmark, hence a market index has been included for comparison purposes. See the Statement of Investment Policy and Objectives for more details on the market index. The market index is a blend of indices that represent the Fund's neutral asset allocation. Note the Fund's investment strategy is designed to achieve its objective, which may mean that at times, the returns of the market index may not be an appropriate measure. 2. After the base fund fee but before tax. 3. Yield to maturity (before tax and fees) for underlying investments in the Fund. 4. Where applicable, the Base Fund Fee includes an estimate of non-related underlying fund charges. 5. The Total Fund Fees comprise the Base Fund Fee and any estimated Performance Fee. Please refer to the Product Disclosure Statement for more information as to how these are calculated. 6. Includes the reinvestment of distributions. Please note past performance is not a guarantee of future returns.
