

Milford KiwiSaver Plan
 KiwiSaver Active Growth Fund
 Monthly Fact Sheet as at 30 June 2022

Portfolio Managers

Jonathan Windust
 Portfolio Manager

William Curtaigne
 Co-Portfolio Manager

The Fund fell 6.1% in June as share and bond markets fell sharply. The major New Zealand, Australian and global share market indices fell 3.8%, 8.8% and 7.8% respectively. Share markets continue to be impacted by uncertainty due to the war in Ukraine, high inflation, rising interest rates and the economic outlook. A higher-than-expected inflation reading in the US of 8.6% led their central bank to increase interest rates by 0.75% during the month. Higher inflation and interest rates are a major hurdle to share markets, making shares less attractive and slowing economic growth. Higher rates are also a negative for fixed income markets which also fell during the month. Falls in fixed income investments meant the Fund was unable to cushion market falls despite a lower weighting in shares.

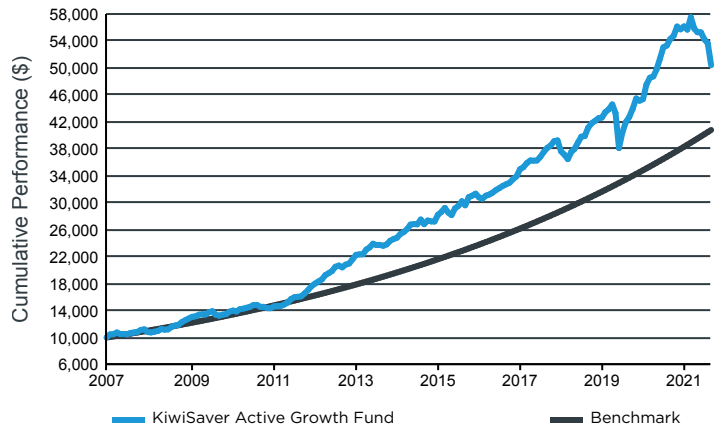

Falling share market valuations meant that most companies had a difficult month including those which we believe have attractive risk/return prospects. The best performers during the month were defensive companies including Bristol-Myers Squibb which rose 2.8% for the month. Bristol-Myers is a global pharmaceutical company which develops, manufactures and sells pharmaceutical and nutritional products. We believe Bristol-Myers has a strong portfolio of drugs (including oncology), an attractive pipeline and is attractively valued. During the month the Fund reduced exposure to shares and increased exposure to fixed income securities. We believe select fixed income investments offer attractive yields and have significantly lower risk than shares.

The short-term outlook for shares remains uncertain with headwinds of higher inflation and higher interest rates which are likely to slow medium-term company growth prospects. Share market valuations have generally improved following market falls and now in many cases reflect a more difficult earnings outlook and high levels of uncertainty. Given the uncertain environment the Fund remains more defensively positioned than typical with a lower weight towards shares. The Fund has increased its holdings in fixed income securities which we believe are reflecting the possibility of higher interest rates. The Fund remains active to isolate those companies which we believe have strong risk-adjusted return prospects.
