

# KiwiSaver Active Growth Fund

Portfolio Investment Entity

## Monthly Fact Sheet as at 30 April 2021

### Portfolio Managers

**Jonathan Windust**  
Portfolio Manager

**William Curtayne**  
Co-Portfolio Manager

The Fund returned 3.3% in April with strong returns from share market indices; global +4.0%, Australia +3.5% and New Zealand +1.4%. Share markets benefitted from continued positive economic data, low interest rates, government spending and very strong company earnings. The Fund performed strongly boosted by strong company selection.

Key positives during the month included Fisher & Paykel Healthcare (+12.0%), Google (+16.5%) and Australian resource companies IGO Limited (+19.3%) and Rio Tinto (+9.4%). Resource companies are benefitting from strong economic activity which is boosting commodity prices and helping companies deliver strong cash flows. Google rose after a strong earnings result with revenue rising 35% and profits by 163%. Google is benefitting from strong demand for search advertising, increasing brand advertising on YouTube and strong momentum in cloud computing. We continue to believe Google remains attractively valued given its strong market positions and growth prospects. During the month the Fund added to holdings in Contact Energy, which was under pressure, taking advantage of passive selling after its index weight was reduced. Contact provides a steady and relatively healthy dividend yield.

The outlook for shares is supported by the prospect of strong economic growth, improvements in company earnings, continued low short-term interest rates and high levels of liquidity. The key headwinds for markets are relatively high valuations, generally optimistic investor sentiment and the prospect of rising interest rates and company taxes. On balance we retain a positive outlook for shares but given high levels of optimism remain selective in our investments and look to avoid companies with inflated valuations.
