

Milford KiwiSaver Plan

KiwiSaver Active Growth Fund

Monthly Fact Sheet as at 31 August 2022

Portfolio Managers

Jonathan Windust
Portfolio Manager

William Curayne
Co-Portfolio Manager

The Fund returned -0.4% in August with negative returns from both bond and share markets. New Zealand and Australian share market indices rose 1.0% and 1.2% in contrast to the global share market index which fell 3.5%. Global share markets and bond markets came under pressure as longer-term interest rates rose. Interest rates rose in response to continued high inflation and talk from central banks around the globe that they would continue to act aggressively to control inflation even if growth is slowing. New Zealand and Australian shares performed well following generally robust earnings reports from major companies which reported during the month. The Fund performed well compared to the markets it invests in given more cautious positioning and a lower weight in shares.

Key company performance in the month included Australian materials company IGO (+21.7%), US energy company EOG Resources (+9.1%), New Zealand telco Spark (+6.3%) and UK bank Barclays (+6.1%). IGO is benefitting from strong demand and prices for Lithium and Nickel which are used in batteries for electric vehicles. Spark benefitted from a solid result and the attractive price it received for its mobile phone towers. The proceeds from the tower sale will allow Spark to return funds to shareholders and invest for future growth. Barclays was aided by a good result and rising interest rates which allow it to generate higher returns in the future.

The short-term outlook for shares remains uncertain with headwinds of higher inflation and higher interest rates which are likely to slow medium-term company growth prospects. Last month's share market valuations, in aggregate, are around long run averages. However they vary significantly by style, with growth company valuations above average as investors remain optimistic about this sector. This variation in valuation provides the opportunity for active management gains over time. Given the uncertain environment the Fund remains more defensively positioned than typical with a lower weight towards shares. The Fund has increased its holdings in company bonds (fixed income) which we believe reflect the high levels of market uncertainty. The Fund remains active to isolate those companies which we believe have strong risk-adjusted return prospects.
