The Fund returned 2.2% in the month bringing the one-year return to -4.6%. The Fund has delivered positive returns since mid-June, helped by rising share markets (notably in Australia), and a weaker NZ Dollar that has cushioned some of the weakness in US shares. Bond markets continue to sell-off, but our income portfolios have been aided by the higher yields we now earn on our bond holdings. This all serves to illustrate the benefits of a diversified portfolio, coupled with an active approach that can tilt the Fund appropriately, given the outlook.

We continue to think that the risks for shares skew to the downside, based on relative attractiveness vs other assets such as bonds, but also a wariness about the economic impact of the global interest rate rises. This means we continue to hold a reduced position in shares at around 40% of the Fund. However, we maintain conviction in the shares that we do own and some of these delivered strong returns in October, for example Elevance Health (+20.4%) and EOG Resources (+22.9%).

Corporate bonds are currently offering attractive yields, with hold to maturity yields of between 5 and 10%. We have been patiently building exposure in this space for the past few months and the Fund now holds around 36% in bonds, 4% above neutral and over 10% more than we held at the start of the year.
