

Milford KiwiSaver Plan KiwiSaver Cash Fund

Monthly Fact Sheet as at 31 October 2023

Portfolio Managers

Katlyn Parker
Portfolio Manager

Ian Robertson
Co-Portfolio Manager

In October, the Fund generated a return of 0.5%, which was in line with its objective to deliver a return in excess of the Reserve Bank of New Zealand (RBNZ) Official Cash Rate (OCR) after fees.

At the October RBNZ meeting, the OCR was kept unchanged at 5.50%, as widely expected by the market. Short-dated NZ dollar bank bills, a reflection of interbank funding levels, pushed lower throughout the month driven by the market paring back expectations of another OCR increase in coming months on the back of softening inflation data. At the upcoming RBNZ meeting in November, the last meeting in 2023, the RBNZ will publish its updated forecast for the OCR track from here. Given its most recent forecasts published in August showed an increased probability of a higher OCR over its forecast period, the market will be focusing on any change to this. Our expectation is, however, that interest rates will remain at relatively elevated levels when compared to recent years, for some time. That will continue to benefit the Fund in terms of the interest rates into which it can reinvest maturing holdings.

The portfolio management of the Fund remains focused on maintaining its low-risk strategy, which is built on a diversified portfolio of cash, short-dated debt securities and term deposits, so as to protect capital. As a reminder, while the yield of the Fund may vary over time, its objective is to deliver a return in excess of the OCR after fees. We expect we will continue to be able to deliver on this objective.
