In October, the Fund generated a return of 0.4%, which was in line with its objective to deliver a return in excess of the Reserve Bank of New Zealand (RBNZ) Official Cash Rate (OCR) after fees.

Short-dated NZ dollar bank bills, a reflection of interbank funding levels, moved significantly lower throughout the month. This was driven by the RBNZ accelerating the easing cycle by delivering a 0.5% cut to the OCR at its October meeting, and the market putting an increased probability on another 0.5% OCR cut at the upcoming meeting in November. Whilst the RBNZ has guided for further OCR cuts to come, our expectation remains that when compared to recent years, interest rates will remain at relatively elevated levels for some time.

The portfolio management of the Fund remains focused on maintaining its low risk strategy, which is built on a diversified portfolio of cash, short-dated debt securities and term deposits, so as to protect capital. As a reminder, while the yield of the Fund may vary over time, its objective is to deliver a return in excess of the OCR after fees.
