The Fund returned -0.5% in the month with a one-year return of -5.5%. Weakness in global bond markets was once again the key performance drag on the Fund, although the Fund has held on to a large portion of the gains since June. Better global economic growth recently means investors are expecting central banks to have to raise interest rates further to combat inflation.

The Fund has a much-reduced exposure to bonds, helping cushion against these falls. The good news is that bonds have now largely made these adjustments and forward-looking returns look healthier. Share markets were volatile in August too, with global shares ending the month down 3.5%. The Fund has also held a much-reduced exposure to shares (around 8%) compared to normal (18%) and the types of shares have been more defensive. In August, strong performance from key holdings Contact Energy (+3.0%) and Spark (+6.3%) also helped Fund returns.

The outlook remains uncertain, economic growth has been resilient but a cost of energy crisis in Europe and an impaired Chinese economy threatens the momentum. With a lot of cash in the Fund (now earning over 3% interest thanks to higher bank rates), this provides plenty of dry powder to deploy if September heralds further market volatility (as it can often do).
