The Fund returned 0.8% in March, partially recovering weakness seen in the year to date. It is now up 10.6% over 1-year. Performance in the month was driven by its share exposure as bond returns were minimal due to the ongoing headwind of rising market interest rates.

Global shares were the largest contributor. Australian shares were broadly stronger with notable gains from the Fund's property shares and Telstra (its largest Australian share holding). While the aggregate NZ share market was also higher, performance across Fund holdings were mixed; gains for Contact Energy (its largest NZ share holding) but weakness across shares including Meridian Energy, Chorus and Investore Property.

Looking ahead, our base case remains moderately optimistic. Supportive fiscal and monetary policy should boost activity and earnings, allowing share valuations to navigate likely rising interest rates. Overall share exposure is therefore close to long-run neutral. Bond exposure is still predominately to corporate bonds which we believe will outperform government bonds and cash over time. That said, we are acutely aware that inflation is a threat, for bonds but also many shares. This makes active management of the Fund's interest rate exposure critical to cushion returns from rising rates. To that end while market interest rate levels are less extreme, we retain interest rate exposure below the long-run neutral. In aggregate, this approach should underpin a moderate Fund return over the medium term although (i) near-term monthly returns could be more volatile and (ii) medium-term returns should moderate relative to recent years.
