William Curtayne
Co-Portfolio Manager

The Fund rose 4.3% in May and benefitted from the continued recovery in share and fixed interest markets. The NZ, Australian and global share markets ending up 3.3%, 4.4% and 4.7% respectively. Share markets reacted positively to the potential for economies to reopen and benefitted from investors looking to put cash to work. We were pleased with the Fund's performance which was generally in line with share markets despite retaining a relatively defensive positioning with high levels of cash. Performance was aided by good company selection and a rebound in credit markets.

Key positives during the month included Australian gold companies, Northern Star (+15.7%) and Evolution Mining (+19.4%) which benefitted from the rise in the gold price. Gold is seen as a beneficiary of the large amount of liquidity being added by central banks which may devalue traditional monetary investments. The Fund's US home improvement store investments Lowe's (+24.4%) and Home Depot (+13.0%) also rose strongly. These stores reported very strong sales and have been a beneficiary of stay at home policies. The stores were deemed essential services and allowed to remain open during lock down and have benefitted from strong demand as consumers look to spend on their homes and gardens.

The Fund was active during the month and generally added to share investments as we became more comfortable that the virus was under control in NZ and Australia. In Australia we added to our holdings in insurance company IAG and supermarket company Woolworths. We believe that both of these companies have good management and strong competitive positions that will enable them to deliver solid returns through a combination of dividends and earnings growth. In NZ we added building company Fletcher Building. Whilst we believe Fletcher Building may remain under pressure in the short term we believe that this was fully reflected in its share price. We remain cautious on global markets where valuations have increased despite still high virus numbers.

In the short term markets are likely to remain volatile given the very uncertain impact of the coronavirus on economies, company earnings and valuations. However, the medium-term impact on company earnings and valuations is lower with many companies' earnings likely to rebound strongly and some even benefitting. On balance the Fund remains cautious given the uncertain environment and recent rise in share market valuations. The Fund has a lower than average allocation to shares of around 70%, however, we remain excited that this market will provide great opportunities for active management gains.
