Bonds and shares contributed positively again to a 0.4% return in July but, as per in June, beneath the surface performance was more mixed. Bonds did benefit from the tailwind of a further fall in market interest rates. Unfortunately, their contribution to the Fund's return was diminished by (i) its reduced exposure to interest rates (as we feared rates would rise) and (ii) a modicum of underperformance in some of its lower rated corporate bonds.

It was difficult to call out a clear trend across the Fund's shares. Company earnings have generally been strong although valuations are no longer cheap, however lower interest rates have helped. The Delta variant has been a headwind, notably for some Australian shares given lockdowns. Australian property companies Goodman Group (+6.9%) and Charter Hall (+5.0%) were however impressive exceptions. The Fund's global shares were generally stronger and included strong performance from US hospital HCA (+20.1%) post an impressive result, and its global water utilities (up over 10%). The Fund also had a small allocation to Sydney Airport which gained 34.9% after a takeover bid.

Looking forward, ongoing growth, historically low interest rates and excess cash liquidity support a reasonable outlook for returns, albeit short-term volatility may increase. We remain wary of bonds given elevated valuations and the risks of higher interest rates. While we anticipate higher interest rates, our base case sees a lower eventual peak to this interest cycle which should support shares. We therefore retain a higher allocation to shares than the long-term neutral.
